SEAN-MORGAN NEVILLE

PROFILE

Motivated and results-driven computer science student with a passion for innovation and technology. Skilled in team collaboration, problem-solving, and project management. Interested in exploring various subfields of computer science, including artificial intelligence and cybersecurity; but open to learning anything new. Always seeking new challenges and opportunities to learn and grow.

WORK EXPERIENCE

DAO Contributor / Core Contributor
2021-Present
I contribute funds to the organization and provide minor quality assurance on code. I collaborate with the team daily to expand on ideas and further develop the current product/project. As well as participate in regular meetings to communicate progress updates. Additionally, I provide feedback and suggestions for improvements and identify potential risks. Through this experience, I have gained valuable skills in working with decentralized autonomous organizations, cross-functional teams, and product development.

Shift Manager / Server
Demetri's BBQ, Homewood, Alabama
2019-2020
I managed a team of servers, managed customer orders, managed complaints, conducted training sessions for new hires, and maintained a clean / presentable restaurant front. This experience allowed me to develop strong leadership skills and a deep understanding of customer service in a fast-paced environment.

EDUCATION

University of Alabama at Birmingham
Fall 2023
Bachelor of Arts in Computer Science
Minor in Art Studio (Photography)
